Continuation of 2, NOTE:

Claim 10 controls the color reproduciton range based upon the color purity controlled by moving a filter into or out of an optical path, while claim 1 modifies a control pattern of the display element, thus, the proposed change to claim 10 raises new issues.

Applicant should note this after final amendment introduces errors in reproducing the claims: see claim 4 line 2 "difference" should be "different", note the previous version of this claim; see claim 8 line 2 same problem; and see claim 2 line 4 where "al" should be "at".

Also note that claim 20 does not not have antecdent basis for "said images of respective colors".
